YL Can you explain how copywriting is different from SEO content writing in less than 70 words?

 Copywriting is focused on persuasive language that motivates readers to take a specific action, such as making a purchase or filling out a form. SEO content writing is focused on creating content that is optimized for search engines to improve its visibility and ranking in search results. While both require good writing skills, copywriting prioritizes persuasion and call-to-action, while SEO content writing prioritizes relevance and search engine optimization.
